DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, ¹²~~6~~-14 and 18-22 drawn to photoelectric conversion elements on a substrate with a storage for storing control information to control accumulation period, classified in class 348, subclass 297.
- II. Claims 4-11, 15-22 drawn to control the amplification factor of amplifying an accumulated charge signal of photoelectric conversion element, classified in class 348, subclass 301.
- III. (Claims 23-58 drawn to photoelectric conversion elements divided into a plurality of regions and output accumulation states of each region with the time period changeable, classified in class 348, subclass 362.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention as claimed in Group I has separate utility such as photoelectric conversion elements which do not include controlling the amplification factor as claimed in Group II, which do not include divided into a plurality of regions and output accumulation states of each region with the time period changeable. This same reasoning could be performed for all of the groups. See MPEP § 806.05(d).

Art Unit: 2612

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Lin Ye** whose telephone number is **(703) 305-3250**.
